MOISTUREPROOF

PATENT PENDING CONCEALED LOCKING SYSTEM PCT/EP2018/073654

I-TIS by ProGame Tatami by Trocellen is a brand new product, the result of the evolution of the previous TIS concept. Every feature of the I-TIS judo tatami mat is innovative and revolutionary. It has been recognized by the International Judo Federation as a preparatory tatami for school activities and for the introduction of children to the practice of judo.

Its patent pending concealed hooking system keeps the mats firmly joined together during performance; the approved I-TIS Easy IJF approved mat is the perfect tatami for all activities aimed at children.

The installed area also does not require containment frames.

Thanks to its extreme lightness, it is easy to install, without leaving gaps between mats and preventing shifting, which happens with traditional tatami mats. The guaranteed safety of this mat and its innovative concealed hooking system make it the safest and most stable tatami on the market, designed to guarantee safety to tomorrow's athletes.

## USE

For all educational and extracurricular activities for children

## FORMULA

Cross-linked expanded polyethylene foam laminated with high-strength embossed PVC

## DIMENSIONS
